INTRODUCTION

This report provides a comparative study of two ERP systems utilized in the hotel industry: eZee Absolute, a cloud-based hotel management ERP system, and Opera, the actual ERP utilized by Mövenpick Hotel Islamabad. The reason for this comparison is to analyze their functionalities, ease of use, and aptness on the basis of realtime experience with eZee Absolute and information gathered during an educational tour.

UNDERSTANDING ERP IN HOTELS

An ERP (Enterprise Resource Planning) system integrates and automates key departments within a hotel—such as reservations, housekeeping, billing, reporting, and customer service. It simplifies operations, minimizes manual labor, improves the guest experience, and provides accurate data across departments

EZEE ABSOLUTE ERP SYSTEM: FEATURES & MODULES

eZee Absolute is a cloud-based hotel ERP system designed for small to mid-sized hotels. It offers a user-friendly interface with extensive modules, including:

Front Office: Dashboard, Reservations, Stay View ,Room View, Insert Transaction, Guest Database, Night Audit, Reputation Management, Lost and Found, Unsettled Folios

Cashiering: Cashiering Center, Travel Agent Database, Sales Person Database, Company Database, Expense Voucher, POS, Exchange Rate

Housekeeping: House Status, Maintenance Block, Work Order.

Other Features: Reports, Exported Reports, Net Locks, Night Audit Log

eZee Absolute
Online Hotel Management Software

MÖVENPICK HOTEL ERP SYSTEM (OPERA)

Mövenpick Hotel Islamabad uses Opera, a widely used enterprise-level ERP system developed by Oracle Hospitality. Opera is deployed in many global hotel chains for managing hotel

operations at a premium level. The system ensures real-time data updates between departments such as front desk, housekeeping, and finance. It supports property management, central reservations, guest profiles, room availability, POS integration, and more. Due to hotel policy, full technical details were not disclosed, but the system is known for its security, scalability, and brand-standard integration.

COMPARISON: EZEE ABSOLUTE VS. OPERA ERP

Feature	eZee Absolute ERP System	Opera ERP System (Used in Mövenpick Hotel)
Deployment	Cloud-based, accessible from anywhere	On-premise & cloud hybrid, typically installed on local servers
User Interface	Simple and user-friendly	Professional, detailed but complex UI
Best For	Medium-sized and budget hotels	5-star luxury and international hotel chains
Modules	Front Office, Reservations, Stay View, Room View, Transactions, Guest DB, Night Audit, Reputation, Housekeeping, Reports, POS, Expense, Company DB, Cashiering	Property Management System (PMS), Central Reservation System (CRS), Sales, Events, CRM, POS
OTA/Channel Integration	Integrated with Booking.com, Agoda, Expedia etc.	Integrated via Oracle suite with major OTAs
Security & Access	Role-based access control, moderate security	High-level corporate security, advanced access protocols
Customization	Highly customizable to hotel needs	Limited customization; follows brand-wide standards
Training Required	Minimal training due to intuitive design	Requires professional training due to complexity

Reporting	Simple and quick reporting with export options	Advanced analytics and complex reporting tools
Cost	Affordable pricing for medium-range hotels	High-cost enterprise-level software

KEY OBSERVATIONS FROM THE VISIT

- Mövenpick uses Opera ERP to ensure consistent luxury service delivery across all departments.
- Department workflows are digital and streamlined.
- Staff emphasized privacy policies and strict system access.
- Although the internal system wasn't shown in detail, the Assistant Food Safety & Quality Manager confirmed Opera's use.

INSIGHTS FROM INTERVIEW:

During the field visit, Mövenpick staff shared insights on how Opera ERP supports departmental coordination, guest service personalization, and secure operations. They emphasized the importance of real-time updates, standardized procedures, and proper staff training for successful ERP use. The staff also explained challenges faced during implementation, particularly around data migration and user adaptation, which matched common ERP deployment experiences in the hospitality sector.

CONCLUSION

After exploring eZee Absolute practically and visiting a real-time Opera ERP environment, the differences are clear:

✅ eZee Absolute ERP is ideal for mid-sized hotels seeking simple, cloud-based management. It's easy, budget-friendly, and suitable for independent or regional hotels.

🛏 Opera ERP is tailored for high-end, international hotel chains like Mövenpick. It offers powerful integration, compliance, and guest personalization—best suited for luxury brands.

In my opinion, based on hands-on experience and the hotel visit:
- eZee Absolute is a great choice for learning and general hotel operations.
- Opera is excellent for complex operations in 5-star or chain hotels.
